Education

LJ University **2022 – Present**
Bachelor of Engineering in Computer Science and Technology *Ahmedabad, India*

Experience

SoftCoding Solutions **Apr 2026 – Nov 2026**
Full-Stack Developer Intern *Work From Office*

- Developed a fully **dynamic e-commerce storefront** for Bizconnect, a company product, using **React.js** and **Vite**, with all storefront content and product data driven by backend APIs.
- Integrated REST APIs using **Axios** and **TanStack Query** for server-state management and caching, reducing redundant network requests; added **Lenis.js** for smooth scrolling.

Skillfied Mentor **Nov 2025 – Dec 2025**
MERN Stack Training Program *Remote*

- Completed a structured **MERN Stack training program** focused on full-stack development using MongoDB, Express.js, React.js, and Node.js.
- Developed end-to-end applications including **Taskfyer** with REST APIs, JWT authentication, and role-based access control; used Git, Postman, and deployment tools.

Projects

Bizconnect | *Live Website* **React.js, Vite, JavaScript, TanStack Query**

- Built a **dynamic e-commerce storefront** with products, categories, banners, and store content fetched directly from backend APIs.
- Integrated REST APIs using **Axios** and implemented **TanStack Query** (`useQuery`) for server-state management, caching, and optimized data fetching.
- Reduced redundant API requests by reusing cached query data across multiple components accessing the same query key, improving data loading responsiveness and minimizing unnecessary network calls; integrated **Lenis.js** for smooth scrolling.

Taskfyer | *Source Code* **MongoDB, Express.js, React.js, Node.js**

- Developed a full-stack **task management system** featuring JWT authentication, role-based access control, and real-time task updates.
- Built a responsive React (Vite) frontend using Tailwind CSS and developed REST APIs with Node.js and Express.js.
- Implemented MongoDB CRUD operations and an **admin reporting feature** to export employee and task assignment data into Excel files.

Premier Zone | *Source Code* **Spring Boot, PostgreSQL, Java**

- Developed a Premier League player statistics application using **Spring Boot** and **PostgreSQL**.
- Imported player data from CSV files into PostgreSQL and developed **RESTful APIs** to retrieve and organize player statistics.

Certifications

HTML, CSS, and JavaScript for Web Developers **Feb 2024**
Coursera

Introduction to Java **Feb 2023**
Coursera

Technical Skills

Programming Languages: JavaScript, TypeScript, Java, Python, SQL, HTML5, CSS3
Frameworks & Libraries: React.js, Node.js, Express.js, TanStack Query, Tailwind CSS, Lenis.js
Databases: MongoDB, PostgreSQL
Developer Tools: Git, GitHub, Postman, VS Code, Render, Vercel
Concepts: REST APIs, Data Structures, OOP, Server-State Management
